

### Customizable Menus

Your webserver now has customizable side menus. To change the layout of your menus, browse to your system's webserver and click the "Settings" button at the bottom.

ReQuest.com | Remote | **Settings**

Then select "Web Site" from the settings pulldown menu

Then next to "Web Page Format, select "Two Sidebars" or "Left Sidebar" from the pulldown menu.

Two sidebars is the "classic" view with some options on the left and the right.

Left Sidebar stacks all the options on the left, giving more horizontal space for cover art and content.

Once you have the menus set up the way you want them, you can also expand or collapse different groups to make room for the options you use more often just click the to collapse a group then click the to expand it again.

All Options Collapsed.

### Now Playing (F, N and S.Series Only)

Your F.Series webserver now contains a new Music Library menu option, "Now Playing". This is a realtime set of transport controls and metadata that you can use just like a touchscreen along with a detailed Now Playing playlist that is full editable (see reverse for new editing options). Controls include:

Volume and Muting

Play/Pause/Stop

Track Next/Prev

Album Next/Prev   
(Performance Skip/Repeat in Classical Mode)

Shuffle/Repeat/Random

## Context Menus

iQ

Click in a blank space near any album, song, song, artist, or cover art you wish to work with, and you will see a new context menu.

This context menu will allow you to play the selected music streaming to your computer, delete the selected music, or add the selection to a playlist.

You can add your music to an existing playlist or create a new playlist right from the context menu. If you create a new playlist, it will then be available throughout the system.

Here we have created a playlist called "Rolling Stones" and now it is available right in the context menu.

N, F, S

Click in a blank space near any album, song, song, artist, or cover art you wish to work with, and you will see a new context menu.

This context menu will allow you to play the selected music streaming to your computer, play it immediately in any zone, or queue it, adding it to the end of the "Now Playing" list of any zone.

← Adding to a playlist and creating new playlists is exactly the same as in the iQ.

## Editing and "Edit All"

Click near any piece of metadata in a page and you will get a context menu with the choices "Edit" and "Edit All"

**Gold - Aerosmith**  
Aerosmith

Release Date: 2005  
Record Date: 2005  
Genre: Rock  
Tracks: 32  
Duration: 2:28:09

[Metadata Lookup](#)  
[Find Cover Art](#)  
[Edit Cover Art](#)

Track	Time	Song
1	3:47	Let The Music Do The Talking
2	4:21	My Fist Your Face
3	3:20	Shame On You
4	4:41	Heart's Done Time
5	4:24	Rag Doll

"Edit" does what you would expect, allowing you to edit just that piece of information.

### Song

"Edit All" makes all the metadata on a page editable at once, allowing you to make extensive changes quickly and easily.

[Save](#) | [Cancel](#)

Track	Time	Song
1	3:47	<input type="text" value="Let The Music Do The Talking"/>
2	4:21	<input type="text" value="My Fist Your Face"/>
3	3:20	<input type="text" value="Shame On You"/>
4	4:41	<input type="text" value="Heart's Done Time"/>
5	4:24	<input type="text" value="Rag Doll"/>
6	4:23	<input type="text" value="Dude (Looks Like A Lady)"/>
7	5:06	<input type="text" value="Angel"/>

Click "Save" when finished to commit all changes.
