

1. Getting Started

Home Page

Toggle between additional commands.

Switch to **Now Playing** Pick a different audio source. Turns off speakers (in the current room)

Choose a different room in the house to control and play music.

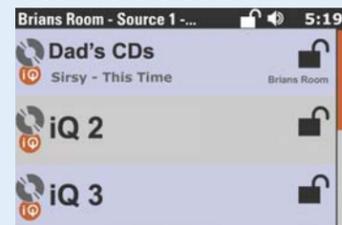

Create specialized party events that play music in multiple rooms from the same source. Examples include whole house party for all rooms, or dinner party that combines the kitchen and dining room.

Displays a countdown for 10 seconds that disables the touch screen during cleaning.

2. Choosing a Source

Source Selection

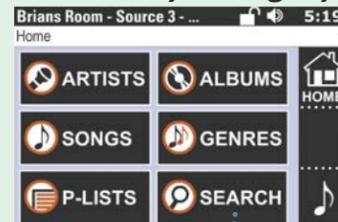

Displays a list of all the available audio component sources, including the iQ CD collection source.

Hard Buttons

3. Finding Your Music

Browse by Category

Select an iQ CD source to choose from Artists, Albums, Songs, Genres, and Playlists. A search option is also available.

- Return to the Home Page
- Switch to Now Playing

Browse

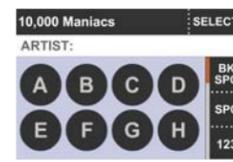

Browse list sorts according to the category. Press the up and down hard buttons to page up and down accordingly.

Press a selection in the list to display the content of that item and show more information (such as the album if browsing by artist) or start playing if displaying songs.

To display play options, press the icon to Play Now or add to the end of the current Now Playing list.

Search

Selecting Search from the Browse by Category allows you to search by Artists, Albums, Songs, or Genres. Use the onscreen keyboard to type the first letters of the desired music title. Use the up and down hard buttons to toggle between the rest of the alphabet or press the 123 button to display numbers.

Browse By Letter

In the browse page, press the abc button. Use the up and down hard buttons to quickly go to the first letter of the music choice in the list. To jump to that letter, touch the letter displayed.

4. Playing Your Music

Now Playing

Display the currently playing music.
